

Database Design Project

Oracle Baseball League Store Database

Project Scenario:

You are a small consulting company specializing in database development. You have just been awarded the contract to develop a data model for a database application system for a small retail store called Oracle Baseball League (OBL).

The Oracle Baseball League store serves the entire surrounding community selling baseball kit. The OBL has two types of customer, there are individuals who purchase items like balls, cleats, gloves, shirts, screen printed t-shirts, and shorts. Additionally customers can represent a team when they purchase uniforms and equipment on behalf of the team.

Teams and individual customers are free to purchase any item from the inventory list, but teams get a discount on the list price depending on the number of players. When a customer places an order we record the order items for that order in our database.

OBL has a team of three sales representatives that officially only call on teams but have been known to handle individual customer complaints.

Section 2 Lesson 5 Exercise 2: Relationships

Identify the Optionality of Relationships (S2L5 Objective 2)

Relationships are bi directional and must either be mandatory or optional.

Part 1 :

For the relationships identified in the previous exercise write the optionality of the relationship between both entities (remember the relationship exists in both directions), the first one has been completed for you.

Left to Right

- Each CUSTOMER may represent a TEAM

Right to Left

- Each TEAM must be represented by a CUSTOMER

Part 2 :

Relationship lines represent a bi-directional relationship between two entities therefore you should think of it as two separate lines that originate from their entity and meet in the middle. Using the descriptions that you wrote in part 1 complete the relationship lines to represent the optionality of each relationship, the first one has been completed for you.

CUSTOMER

- # Number
- (#) Email
- * Name
- * Address
- * Phone number
- * Current balance
- o Team they belong to

ORDER
