

Database Foundations

4-2: Convert a Logical Model to a Relational Model Practices

Exercise 1: Forward Engineer a Logical Model to a Relational Model

Overview

In this practice you forward engineer the Academic Database Logical Model to a Relational Model using Oracle SQL Developer Data Modeler.

Tasks

1. To forward engineer the Logical Model of the Academic Database to a Relational Model perform the following:
 - a. Open the Logical Model in Oracle SQL Developer Data Modeler
 - b. Click the **Engineer to Relational Model** icon
 - c. Accept all the defaults and click **Engineer**.
 - d. Expand the Relational Models node in the object browser to view the objects created
